Job Description

Job Title: Network Security Engineer
Department: Information Technology
Reports To: Information Technology Director
Prepared By: Personnel
Prepared Date: April 17, 2013

FLSA Status: D.O.E. (Exempt)

Summary: The Security Engineer role is to ensure the security, stability, integrity, and efficient operation of the in-house information systems that support core organization functions. This is achieved by monitoring, maintaining, supporting, and optimizing all networked software, hardware, and associated operating systems. The Security Engineer will apply proven communication, analytical, and problem solving skill to help identify communicate, network security throughout the network infrastructural, and resolve any types of physical/or virtual security issues in order to maximize the benefit of IT systems investments.

Essential Duties and Responsibilities include the following. Other duties may be assigned.

- Deploy corporate-wide encryption
- Deploy a next generation solution
- Deploy a next generation IPS/IDS
- Deploy a next generation Firewall
- Must be available for 24 x7 on call status including holidays
- Centralize alerting and forensic logging with SEIM
- Roll out corporate security policies
- Deliver corporate security awareness and training
- Run frequent information security self-assessments
- Perform regulatory compliance self-assessments
- Drive to and from job sites
- Value, protect, track and manage all corporate assets
- Test business continuity and disaster recovery planning
- Monitor network security internal/external, WLAN, WWAN
- Implement network security best practices
- Insures adherence to traffic latency tolerances, responsible for overall layer 2 & 3 network design that improve routing and bandwidth efficiency
- Manage and monitor perimeter and backend security using Anti-Virus, IDS, IPS, and other proactive security monitor tools
- Configures and maintain Cisco Call Manager, Unity and VoIP Telephone Infrastructure
- Reviews and enforce network security policies that applied throughout infrastructure

Supervisory Responsibilities

This job has no supervisory responsibilities.

Competencies

To perform the job successfully, an individual should demonstrate the following competencies:

Analytical – Synthesizes complex or divers information; Collects and researches data; Uses intuition and experience to complement data; Designs work flows and procedures.

Design – Generates creative solutions; Translates concepts and information into images; Uses feedback to modify designs; Applies design principles; Demonstrates attention to detail.

Problem Solving – Identifies and resolves problems in a timely manners; Gathers and analyzes information skillfully; Develops alternative solutions; Works well in group problem solving situations; Uses reason even when dealing with topics.

Project Management – Develops project plans; Coordinates projects; Communicates changes and progress; Completes projects on time and budget; Manages project team activities.

Technical Skills – Assesses own strengths and weaknesses; Pursues training and development opportunities; Strives to continuously build knowledge and skills; Shares expertise with others.

Customer Service - Manages difficult or emotional customer situations; Responds promptly to customer needs; Solicits customer feedback to improve service; Responds to requests for service and assistance; Meets commitments.

Interpersonal Skills - Focuses on solving conflict, not blaming; Maintains confidentiality; Listens to others without interrupting; Keeps emotions under control; Remains open to others' ideas and tries new things.

Qualifications To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Education and Experience

- Minimum 4 years of hands-on experience with network design, operational support, hands-on implementation and configuration of switches, routers, firewall, IDS, IPS, VPN, S.I.M., and cabling in different LAN/WAN environments.
- A.A. or A.S. or Bachelor's degree (B.A.) from an accredited (4) year college or university preferred in Computer Science, Information Systems or equivalent in MIS/IT professional certifications with technical education and hands-on work experience with (2+) years relevant MIS/IT experience in related fields.
- Strong knowledge on Cisco command line interface.
- Ability to demonstrate security threat, prevention, audit, documentation, and recommend best security practices.
- Experience with Cisco Call Manager 4, 5, or 6.0, Call Manager Express, Cisco Unity and Cisco Unity Express
- Experience troubleshooting and resolving issues related to Voice and related application performing on IP networks
- Hands-on experience configuring Microsoft Windows Server 2000-2003 OU's GPO's, SUS, DHCP, DNS, IPSec Policy, RADUIS, SSL, VPN and User Authentication Protocols.
- Extensive experience designing, implementing, and troubleshooting VLANs using Cisco equipment, to include intimate knowledge of Spanning Tree Protocol, VLAN' using Cisco inter-VLAN routing. IPV6 and trunking with ISL and 802. 1q.

Language Skills

- Ability to read and interpret documents such as safety rules, operating and maintenance instructions, and procedure manuals.
- Ability to write routine reports and correspondence.
- Ability to speak effectively before groups of customers or employees of organization.

Mathematical Skills

- Ability to calculate figures and amounts such as discounts, interest, commissions, proportions, percentages, area, circumference, and volume.
- Ability to apply concepts of basic algebra and geometry.

Reasoning Ability

- Ability to solve practical problems and deal with a variety of concrete variables in situations where only limited standardization exists.
- Ability to interpret a variety of instructions furnished in written, oral, diagram, or schedule form.

Computer Skills

- Advanced knowledge of configure VPN, MPLS, EIGRP, OSPF, BGP RIP, FR/ATM, ACLs, TCP/IP, IPX, and digital private or public SSL digital cert.
- Requires a high-degree of experience and certification levels across a broad array of technologies and vendors including Cisco, HP, VMware, Microsoft, Linux, and Open source tool managements
- Advanced knowledge of Cisco router, switches and firewall configuration is required
- Advanced knowledge of MPLS, EIGRP, OSPF, BGP, RIP, FR/ATM, ACLs, TCP/IP, IPX is required
- Advanced knowledge of Group VPN, SSI, AAA, RADUIS, Digital Cert., DHCP configuration
- Advance knowledge of Cisco VoIP- **Desired**
- Participate in the implementation of complex Voice over IP (VOIP) and IP Telephone (IPT) projects
- Ability to design and/or implement LAN/WAN infrastructure with quality of service (QoS) for dedicated voice applications

Certificates/Licenses

- Possess a Valid California Drivers License -**Required**
- Cisco Certified Internetwork Expert (CCIE Routing and Switching) - **Preferred**
- Valid and current CCNA certification (Cisco certified network associated)- **Required**
- Valid and current CCNA certification (Cisco certified network professional)- **Required**
- CompTIA Certification - Must possess (1) Certification (Network+, or Security+)-**Required**
- Microsoft Certified System Administrator (MCSA) or Microsoft Certified Technology Specialist (MCTS) -**Required**

Others Skills and Abilities

- Network design-**Required**
- Advance knowledge of VLAN's configuration
- IP addressing design IPv4 and IPv6
- Router and switch Cisco CL programming-**Required**
- Network protocols- **Required**
- Layer 2 & 3 networks knowledge- **Required**
- Security management knowledge- **Required**
- Excellent oral communication and technical writing skills

Other Qualifications

- Must pass a pre-employment written examination with a score of 70% or higher.
- Must pass Tachi Gaming Commission background check and hold a valid Gaming License throughout employment
- Must be insurable through company insurance carrier and maintain throughout employment
- Must pass a pre-employment drug and alcohol screen
- Must pass pre-employment physical
- Must provide Criminal History Report
- Must provide Current DMV Printout
- Must provide TB Skin Test

Physical Demands

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- While performing the duties of this job, the employee is regularly required to stand, walk, sit, using hands to finger, handle, or feel; reach with hands and arms and talk or hear.
- The employee is frequently required to climb or balance and stoop, kneel, crouch, or crawl.
- The employee must regularly lift and/or move up to 25 pounds.
- Specific vision abilities required by this job include ability to adjust focus.
- Must be able to physically and virtually demonstrate security best practices on a Cisco router, switches, servers, and firewall

Work Environment

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- Must be able to work under normal business operation hours from 8:00am to 5:00pm Monday through Friday without any issue during your employment. Unexpected abnormal operation request. You will be required to be on call 24/7 and work as needed by Director.
- The noise level in the work environment is usually moderate.
- Must be able to work in local weather conditions, assignments will vary from interior and exterior work.
